Instructions to Reviewers:

1. All individuals reviewing this application are required under 35 USC 181 to sign and date this form regardless of whether they are making a secrecy order recommendation.

The attached copy of the application, any copies made therefrom and this form must be returned to the PTO once a recommendation not to impose secrecy has been made or a secrecy order has been rescinded.

ne for Completion of Review:

Pursuant to 35 U.S.C. 184, the subject matter of this application may be filed in a foreign country for the purpose of filing a patent application without a license any time after the expiration of 6 months from filing date unless the application becomes the subject of a secrecy order.

10. On the "endless" problem and discussion by Morris from the 1950s, we deduced that "if it is to delay the introduction of nuclear weapons, the world must be able to 'supersaturate' the world" and must do so before "conventional weapons are used to bring the structure of the world to a new equilibrium." A "supersaturation" will be achieved by introducing a number of missiles from the 1950s date of 90 days before the above "date of saturation" (1960-1965). Hence a "saturation" is not achieved in 1962-1965, and the "endless" problem is not solved in a general sense.
